

About Wylei

Wylei Inc., a pioneer in predictive AI cloud-based machine learning and marketing automation, enables the creation and dynamic assembly on open of real-time, personalized content to engage over 50 percent more buyers per marketing campaign. Wylei is an official Facebook Marketing Partner, Instagram Partner, and Salesforce Partner. Wylei's AI (artificial intelligence) technology drives true personalization at scale efficiently eliminating the need for A/B testing and utilizing Wylei's new AI Testing platform. Working with high profile consumer and technology brands, the patented SaaS self-serve Wylei Predictive Content™ platform delivers real-time digital content that is assembled and displayed based on first party data, context, user behavior and preferences in record time. Working across all channels and any device, including email, video, display, web, social, Facebook, Instagram, and Salesforce, Wylei's technology is utilized by leading brands, marketers and digital agencies such as Epsilon, YLM, Marriott, Adidas, Dell, FTD, Wunderman, Fairy Tales Hair Care, and other Fortune 500 companies. Co-founded by Harvard, MIT, Stanford and Carnegie Mellon experts, Wylei's Predictive Content™ maintains secure, highly scalable, robust cloud based infrastructure built in the Amazon Web Services stack. The company's headquarters is in Jersey City, NJ. For more information, visit www.wylei.com.
